

What is a PASSE?

The PASSE model is a Medicaid-funded program. It does not change a person's eligibility for Medicaid, but it will change the way services are paid for by Medicaid for certain eligible individuals.

Each PASSE acts a lot like an insurance group that providers join to be in network, and the PASSE covers healthcare services for its members.

What services will be covered?

The PASSE must make sure that a member has access to all services covered under the Medicaid state plan, the Community Independence Waiver services and Community & Employment Supports Waiver services, including therapy services and services through the Early Periodic Screening Diagnosis and Treatment (EPSDT) program for children.
